

Oregon Soil and Water Conservation Society

JUNE 30, 2025 SWCS FIELD DAY

Cover Crops in Hazelnut Orchards

Cover crops are an essential tool in managing weeds, preserving soil moisture, enhancing soil biology, increasing water filtration, and minimizing soil erosion. In hazelnut orchards cover crops could be a barrier to effective harvest. Learn how to make this important conservation tool work in a hazelnut cropping system!

Event is free to attend and light refreshments will be provided.
